

## Activate Your Fusion Now

LPC Tel Co has completed construction of the Fusion Network in La Porte City. We are excited to announce that we are ready to activate state-of-the-art fiber optic service for customers living in La Porte City. There will be no additional charge to customers who keep the same level of service that they currently subscribe to. Please call our office at 342-3369 as soon as possible to schedule your activation. Our goal is to convert every customer in La Porte City to fiber optics by the end of the summer, so we appreciate your cooperation in scheduling your appointment soon.

Chris Hopp, general manager, commented about this exciting milestone. "Our employees are working diligently to cut-over as many customers to the Fusion Network as we can to provide you with faster Internet speeds and access to new services such as FusionTV."

Your telephone and Internet services will be transferred to our new Fusion Network with minimal to no disruption of your existing service. The activation will take approximately one to two hours, and before leaving, our technicians will make sure that all of your services are working.

Construction of the Fusion Network began nearly 12 months ago. While most communications companies utilize fiber optics to transport communications services through some part of their network, they do not deploy it all the way to the home. LPC Tel Co goes the extra step to deploy fiber all of the way to the home providing more bandwidth opportunity and a more reliable signal.

There will be no charge to transfer service to the Fusion Network, and the rates for the services you currently receive will not increase due to this construction. The fiber network will bring about the opportunity for enhanced services such as faster Internet speeds. If you choose to upgrade your service, there may be additional monthly fees associated with that decision.

**SAVE UP TO \$360!**

*Shawn Mehlert saw his Internet connection quadruple when he activated his Fusion Network service.*

## Faster Internet Speeds, Happier Customers

Recently La Porte City Tel Co customers began experiencing faster Internet connections when we activated their Fusion Network connection. And the best part? The monthly price customers pay for high-speed Internet will stay the same. Subscribers with 1.5 Mbps Internet and Home Phone service will see their speeds increase to 6 Mbps when the Fusion Network is activated in their home or business.

Why are faster Internet speeds important? Just ask Shawn Mehlert, one of the first Fusion Network customers. Shawn saw his Internet connection quadruple when he activated his Fusion Network service. "The download is unbelievable. Everything loads instantly," said Shawn of his new Internet connection. "I have had zero problems with my router since switching to the fiber optics."

**Upgrade your existing service by adding high-speed Internet when you activate your Fusion Network connection. Ask about our special offer when you schedule your appointment.**
