- 1. Route and type of facilities
  - a. The Company shall determine the route and type of construction which will be used in the extension of its facilities within an exchange. All such line extensions shall be owned and maintained by the Company.
  - b. The Company will be responsible for the route of the proposed line extension facilities upon which costs will be developed. Such routes will include the last pole or cable distribution box on public or private property but will exclude the drop wire (maximum of \_\_) for the building in which the telephone service is to be located.
  - c. Any difference in costs between the type of construction proposed by the Company for use on a line extension and the type of construction requested by the customer will be charged at actual cost for the difference. (See Part II, Special Type of Construction.)
  - d. When two (2) or more applicants mutually agree they may be considered as a "group." Line extension charges will be established in order to determine the amount of construction which needs to be provided. Line extension charges computed for the total extension, less allowable costs, may be proportionately divided among the applicant making up the "group."
- 2. Obligation of the Company
  - a. The Company's obligation to provide service through line extensions is solely dependent upon its ability to secure, retain, and maintain suitable rights-of-way without unreasonable expense.
  - b. The Company will survey all prospective customers who could receive service from each proposed line extension project prior to its construction.
- 3. Payment of charges applicable to line extensions shall be paid in advance.
- 4. Applicants requesting service which can be provided from a previously established line extension project:
  - a. Within 12 months from the time service was initially provided by means of such line extensions, initial charges will be recomputed by the Company and the applicant will pay a proportionate share of such charges as if they were one of the initial applicants and appropriate refunds will be made to the original customer(s).
  - b. After 12 months from the time service was initially provided, such applicant(s) will be responsible for the charges and conditions applicable to the establishment of line extension facilities required to serve them alone.
- 5. Except as provided elsewhere in this Services Catalog, refunds of line extension charges will not be paid by the Company.

- C. CONDITIONS (Continued)

  - 7. The Company will have the option to specify the type of construction to be used when line extensions are requested for service into real estate subdivisions or mobile home parks. Any difference in costs of types of plant facilities used by the Company or requested by the subdivider will be negotiated between the parties.
  - 8. When the line extension proposed contains growth potential to provide for anticipated future service demands, the proposed customer(s) will only be obligated for that portion of such line extension costs as would be necessary to serve the new customer alone. It will be to that segregated amount that the Formula for average Outside Plant costs will be applied.
  - 9. Line extensions of a temporary or speculative nature
    - a. Line extension of the Company's facilities may be made to provide service of a temporary or speculative nature. An applicant whose service is considered speculative or temporary in nature will be charged the total actual costs of construction and estimated costs of removal, less salvage value, for the material used to establish the service.
      - 1) If after a 12-month period the temporary or speculative project is considered by the Company to be a permanent service, a refund may be made to the customer for the difference between costs paid and the charges which would have been computed for a regular line extension.
