- iii. This Privacy Statement describes how Company and its affiliates collect information from or about you, either as a customer, visitor to any Company website, when you order services from us, how we use the information we collect, and the choices customers have concerning the collection and use of such information.  - v. Use of Personally Identifiable Information. The Company uses PII to provide products and services to meet customers' needs, including new products or services. Company may share PII with any Company-affiliated company, and these

RULES AND REGULATIONS

companies are subject to the terms of this Statement.

The Company retains PII only as long as is necessary for Company to comply with business, tax and legal requirements. This retention period could be the entire time you are our customer depending on the type of PII.

- c. Customer Proprietary Network Information (CPNI)
 - i. CPNI is information that relates to the quantity, technical configuration, type, destination, location and amount of use of the telecommunications services purchased by you from Company. Company may, without prior approval from you, use CPNI to provide or market service offerings to you, if the service offerings are within the same categories of service to which you already subscribe, regardless of your decision to opt-out of other uses of CPNI.
- d. Value-Added Services
 - i. Because we appreciate the trust you have placed in us, we continually look for ways to enhance your customer experience. From time to time, we may notify you about a Company product or service using the information you have provided to us either in person, telephonically or electronically by visiting our websites or using our mobile apps, including information you provide to use our services. We strive to limit our offers to those we think you would benefit from and appreciate receiving.

- i. To assist us in developing, promoting, establishing, maintaining, and/or providing Company-related products and services to you, including joint marketing efforts or promotions, but PII may not be used by the third parties for any other purpose;
 - ii. To assist us in establishing accounts, billing, collecting payment (i.e. credit bureaus and collection agencies), enforcing the Terms and Conditions of our Company services where permitted by law, and protecting or enforcing our rights or property, or the services of our other customers, from fraudulent, abusive, or unlawful use by you of our services;
 - iii. To comply, when required by law, with court or administrative orders, civil or criminal subpoenas, warrants from law enforcement agencies, federal or state regulatory requirements, mandatory governmental audits, E911 reporting requirements, grand jury investigations, civil or criminal governmental investigations, or reporting required by the National Center for Missing and Exploited Children, designated by federal law as a reporting mechanism for child pornography; and
 - iv. To appropriate law enforcement, 911 centers, or emergency services when Company, in good faith, believes the disclosure is necessary to protect a person, Company property, or the public from an immediate threat of serious harm.

Company has physical, electronic, contractual, and managerial security measures in place to protect against the loss, misuse and alteration of information under our control. For example, when you place an order on a Company Website, the information you submit is encrypted using the Secure Sockets Layer (SSL) protocol.
- ii. Company employees are bound by non-disclosure agreements that prevent them from disclosing any PII or CPNI. Further, Company guidelines state that Company employees must abide by all state and federal privacy and security laws and regulations in the performance of their job duties.
 - iii. Our policies also limit access to PII to only those employees, contractors, agents, or representatives that require the information to perform their jobs or assist Company with providing products and services to you.
- h. Children
- i. Children under the age of majority should consult with their parents or guardian before furnishing any data to us. Parents should consider using one of a number of available parental control tools that provide a child-friendly, on-line environment and can prevent children from disclosing PII without parental consent. If a child has provided personal information without the consent of a parent or guardian, that parent or guardian should contact the Company to request that the information be deleted from our records. More information about parental controls may be found on Company websites or by contacting a Company customer care representative.
 - ii. Company does not knowingly collect PII from children under the age of 13 in connection with providing products and services, and it strives to comply with all provisions of the Children's Online Privacy Protection Act (COPPA). If Company inadvertently collects information from minors below the age of 13, the information will be treated as PII of the adult customer.

29. Network Call Transfer: Enables a subscriber to transfer two calls into a new call between remote subscribers while releasing their own connection. NCT works as follows: A calls B, B calls C, B transfers the call to C which releases B's connection. The party transferring the call drops out of the call when the transfer is completed, freeing up the line while two calls remain in operation. The line that transferred the call is now available for other calls, increasing the line's capacity.
30. Priority Call: Allows a customer to assign a maximum of 8 callers' telephone numbers to a special list. The customer will hear a distinctive ring at their location, when calls are received from callers' telephone numbers on that list.
31. Remote Call Forwarding: A service provided in lieu of an individual line whereby a call placed to a customer's telephone number in one central office is automatically forwarded by Company central office equipment to another customer designated line.
32. Selective Call Forwarding: Allows a customer to specify a special list of a maximum of 8 telephone numbers. Incoming calls placed to the customer from telephone numbers on that list will automatically be forwarded to a predefined telephone number. All other calls will be handled normally.
33. Selective Call Rejection: Allows a customer to block calls from specific numbers. Calls from numbers included in a customer's list will receive an announcement informing the caller that they are not receiving calls at this time.
34. Speed Calling: Enables a customer to place calls to other telephone numbers by dialing a one- or two-digit code rather than a complete telephone number. Customer may subscribe to only one of either the 8 Code capacity or 30 Code capacity on the same line.
35. Telemarketer Call Screening: Screens all incoming calls and plays a message for those calls that do not provide valid Caller ID information. The option does permit the caller to press a 1 which will allow the call to proceed and ring the called line.
36. Three Way Calling: Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. The transmission may vary depending on the distance and routing necessary; therefore, transmission may not meet normal standards.
37. Warm Line Service: Allows a customer to establish a switched connection to a predetermined number if the customer does not dial a number within a specified length of time after going off-hook. When the customer's telephone goes off-hook and dialing begins within a specified time delay period, the call will proceed normally as dialed. If dialing has not started before the end of the predefined time

2. Control of the number assignment on the shared speed call list associated with Group Intercom resides with the provider. The provider must have an access line in the same central office as their client for the purpose of controlling the speed call list. The access line will be restricted from dialing any toll calls billable to the end user.
