

The Connector

Expect More. Do More.

Q1 2024 Newsletter

Compressed Air & Equipment Co.

Compressed Air & Equipment Co. was established in 1979 by Rick Foss. Their team of nine employees celebrates over 40 years of innovation, reliability and customer commitment specializing in providing air compressors for garage units, commercial and industrial air compressors, and rotary screw compressors for those requiring a constant air supply.

Since the inception of Compressed Air & Equipment Co. in 1979, they have entrusted their communications needs to LPC Connect. Currently, they utilize four business phone lines and leverage LPC Connect's robust internet to fuel their operations.

Much like LPC Connect, they are committed to exceptional service. Compressed Air & Equipment prides itself on delivering the best customer experience, treating each client as part of their extended family. Their work ethic extends beyond just providing products – they ensure that jobs are left cleaner than they found. Effective communication is at the core of their service philosophy. They keep their clients informed and updated throughout the process, highlighting any significant considerations before proceeding.

Compressed Air & Equipment heavily relies on effective communication, and LPC Connect has played a pivotal role in ensuring their productivity.

The business phone lines have proven invaluable, especially during peak times. Moreover, the Internet services provided by LPC Connect serve as the backbone for their email communication and various applications crucial for seamless business operations.

The team at LPC Connect has consistently demonstrated a proactive approach to address any issues they may encounter. "They have always been accommodating & quick to respond to any issues we have had and are always quick to resolve any troubles," said General Manager Pam Mahood.

As Compressed Air & Equipment Co. continues its journey in providing top-notch air compressor solutions, they are grateful for the partnership with LPC Connect, a company that shares its commitment to excellence and customer satisfaction.

How Smart Home Technologies Help You and Your Home

Smart home automation refers to using technology to control and automate various aspects of a home, enhancing convenience and efficiency. This involves connecting and remotely managing devices such as lights, thermostats, security cameras, and appliances through a central system or a smartphone app. The goal is to create an interconnected ecosystem that allows users to monitor, control, and optimize their home environment for comfort, energy efficiency, and security.

Smart home automation has become increasingly popular and there are many cool devices available to make your home more convenient, efficient, and secure. Here are some interesting smart home devices:

Smart Thermostats: Smart thermostats learn your preferences and adjust the temperature accordingly. It can also be controlled remotely via a mobile app.

Smart Lighting: LED smart bulbs can be controlled through a mobile app, allowing you to change colors and set schedules.

Smart Door Locks: Allows you to control and monitor your door lock remotely. You can also grant access to guests with virtual keys.

Smart Security Cameras: Security cameras and video doorbells, like Ring, have a built-in camera that allows you to see and speak to visitors through your smartphone.

Smart Plugs: Allows you to turn traditional devices into smart ones, controlling them remotely or setting schedules.

Smart Sensors: Detects motion, temperature, and vibration. It can trigger other smart devices based on these conditions.

Smart Smoke Detectors: A smoke and carbon monoxide detector that sends alerts to your phone and can be silenced remotely.

Smart Speakers: These voice-activated speakers, like Amazon Echo or Google Home, can control various smart devices and provide information or entertainment.

Smart Blinds: Motorized shades that can be controlled via a smartphone app or integrated into a smart home system.

Smart TV: These smart TVs allow you to stream content, control other smart devices, and use voice commands.

Smart Garage Door Opener: Chamberlain MyQ Smart Garage Hub allows you to control and monitor your garage door remotely using a mobile app.

Smart Kitchen Appliances: A smart refrigerator with a touchscreen that allows you to manage groceries, leave notes, and even see inside the fridge with built-in cameras.

Smart Sprinkler System: Monitors weather conditions and adjusts your sprinkler system accordingly, saving water.

We recommend before purchasing any smart home device, make sure it's compatible with your existing devices and choose products that are secure and have good reviews. Integration with popular smart home platforms like Google Home or Amazon Alexa can also enhance the overall experience. And remember, you will have the best experience with smart home automation with robust internet connectivity like that provided by LPC Connect.

Whole-Home WiFi Connect From LPC Connect

Everything you want in home WiFi for every room, every device, every day

We make it easy to enjoy fast and reliable WiFi throughout your home. LPC Whole-Home WiFi Connect provides a next-generation WiFi 6 router for seamless signal continuity plus 24/7 remote support for a hassle-free experience.

Go ahead. Relax.
